AI that doesn't know when it's wrong is a liability.

Real-time cognitive monitoring and active intervention for enterprise AI pipelines.

Product	PsiGuard — AI Safety Monitoring Platform
Company	PsiCo, LLC
Document	Enterprise Overview — February 2026
Contact	enterprise@psiguard.net · psiguard.net/enterprise

OVERVIEW

What PsiGuard does — and how.

PsiGuard is a real-time AI monitoring layer that sits between your application and any large language model. It evaluates every AI response as it streams — scoring behavior across four cognitive dimensions — and intervenes when output crosses reliability thresholds.

PsiGuard is not a passive after-the-fact scorer. It is not just a dashboard. It watches both the prompt going in and the model behavior coming out, scoring trajectory in real time — and when thresholds are crossed, it can intervene before the final output reaches the user.

ARCHITECTURE

How it fits into your pipeline.

Your Application	→	**PsiGuard Monitoring Layer**	→	**Your LLM (OpenAI / Anthropic / Gemini / Custom)**
Sends prompts receives responses		Intercepts · Scores Monitors · Intervenes		Text generation no changes needed

THE FOUR COGNITIVE METRICS

Every response scored across four behavioral dimensions.

Coherence	Is the response logically consistent? Drops indicate the model generating content it's uncertain about.
Drift	Is the AI staying on task? Rising drift signals the model wandering from the prompt — a precursor to hallucination.
Entropy	How uncertain is the model? High entropy indicates the model spreading probability across many outputs — unreliable territory.
Stability	Is the model maintaining consistent behavior across the conversation? Dropping stability signals cognitive state shifting mid-response.

SECURITY & DATA ISOLATION

Your data is yours. Full stop.

Enterprise evaluators and customers frequently ask about data handling before allowing any third-party monitoring in their AI pipeline. Here is a plain-language summary of how PsiGuard handles your data.

✓ **Account isolation** — All accounts are fully scoped by UID in Firestore. It is architecturally impossible for one account to read or write another account's data.

✓ **No cross-account aggregation** — PsiGuard does not compute cross-account averages, benchmarks, or baselines. Your evaluation data is never included in any aggregate analysis involving other customers.

✓ **No shared caching** — There is no shared caching layer between accounts. One account's session data cannot be accessed from another account's session.

✓ **Zero training usage** — Your conversation data and metric outputs are never used to train any AI model — by PsiGuard or any third party.

✓ **Export & deletion** — You can export all conversation data and metric history at any time from the Console. Account closure triggers full data deletion.

✓ **Encryption** — All data is encrypted in transit (TLS) and at rest (AES-256) via Google Cloud / Firebase infrastructure.

✓ **Sandbox evaluation accounts** — Enterprise evaluators receive a dedicated sandbox account explicitly tagged at the account level. Evaluation data is labeled and never co-mingled with production accounts.

COMPLIANCE ROADMAP

Formal certifications in progress.

The following items are on our active roadmap. We are transparent about what is in place today versus what is planned, because enterprise buyers deserve honest timelines.

Q2 2026	Formal Data Processing Agreement (DPA) — available for enterprise customers
Q2 2026	SOC 2 Type II audit — initiated
Q3 2026	GDPR documentation package — EU customer readiness
Q3 2026	Account closure deletion confirmation (automated audit trail)

On Request   On-premises deployment for regulated industries (healthcare, finance, legal)

PRICING

Start free. Scale when you're ready.

	Free	Pro	Enterprise
Price	$0 / forever	$99 / month per team (up to 5)	Custom contact us
API Calls	Limited monthly	Unlimited	Unlimited + SLA
Metrics	4 cognitive metrics	All metrics	All metrics + extended
Models	1 model	Multi-model	Multi-model + custom
Sandbox Eval	—	—	✓ Dedicated
Integration Support	—	Priority support	Dedicated account mgr
On-Premises Option	—	—	✓ Available
SLA & Uptime	—	—	✓ Custom SLA

GET STARTED

Request Enterprise Access

Enterprise sandbox accounts are provisioned manually. We respond within one business day with your evaluation credentials and a brief onboarding call invitation.
